IMPLANTS

PREDICTABLE IMPLANTS AND PEACE OF MIND

INTRODUCTION

All-on-X

Predictable implants and peace of mind

Digital Smile **All-on-X** implant dentures are a natural-looking, beautiful solution for edentulous patients. Our digital design the process gives you an efficient and precise prosthesis. Whether your surgical preference is traditional or fully guided, our expert case planning produces predictability and peace of mind: our team is ready to work with you every step of the way!

Hybrid Dentures

Embrace a new era of dental comfort and beauty

Hybrid Dentures from Digital Smile are reliable alternatives to removable prostheses for edentulous patients. By using the Latest CAD/CAM technology, acrylic teeth are carefully crafted onto a custom-milled bar and securely fastened using abutment screws.

Implant Supported Dentures

Reclaim confidence with implant-supported dentures

An **Implant-Supported Removable Denture**, also known as an overdenture, is created using CAD/CAM technology and can be easily taken out by the patient.

It involves the use of a bar that is implanted, and the denture is constructed with internal attachments that connect to the bar, resulting in both aesthetic and functional benefits.

Implant-Supported Zirconia Bridges

The ultimate in implant dentistry

Digital Smile offers **Implant-Supported Zirconia Bridges**, a precise and dependable solution for dental restoration. We provide expert case planning, streamlined digital workflows, and direct communication with our technicians to ensure predictable and successful clinical treatments. No matter how complex the case, we are dedicated to your practice and your patient's satisfaction.
